

PRAKHAR SRIVASTAVA

TECHNICAL PROGRAMME MANAGER | ENGINEERING DELIVERY | SOFTWARE & PLATFORM SYSTEMS

+91-9008175815 | srivastava.prakhar91@gmail.com | <https://www.linkedin.com/in/prakharshreevastava/>

SUMMARY

Technical programme and engineering delivery leader with 12+ years of experience spanning software development, engineering leadership, enterprise platforms, and AI-enabled automation. Experienced in leading cross-functional engineering initiatives, translating product and business priorities into executable roadmaps, managing technical dependencies and delivery risks, and improving engineering productivity. Combines a software engineering foundation with programme governance, stakeholder leadership, and a focus on scalable, reliable technology and measurable outcomes.

CORE COMPETENCIES

Technical Programme Management • Cross-Functional Engineering Delivery • Multi-Team Programme Planning • Technical Dependencies & Risk Management • SDLC • Release & Deployment Planning • Engineering & DevOps Coordination • API Integrations • Technical Issue Resolution • System Performance & Reliability • Delivery Governance • Resource & Capacity Planning • AI-Enabled Automation • Python • FastAPI • Jira • Azure DevOps • Cloud-Native Architecture (Kubernetes, AWS — Familiarity)

PROFESSIONAL EXPERIENCE

Facctum | Senior Technical Delivery Manager | AML & Financial Crime Compliance | Enterprise | 2026 – Present

- Lead enterprise **AML/Fraud detection platform** implementations, aligning customer requirements, product capabilities, technical dependencies, delivery milestones, and operational readiness.
- Coordinate product, engineering, customer, and compliance stakeholders to **resolve delivery risks**, manage escalations, and maintain alignment on implementation priorities.
- Translate complex financial-crime compliance **workflows into actionable implementation plans**, coordinating delivery across screening, transaction monitoring, and alert-management capabilities.
- Support complex international deployments, including the **planned rollout of the platform across approximately 11 countries** for an exchange customer.

Cyncly | Technical Program & Platform Delivery | Senior Product Owner | Digital & AI Platform | 2025 – 2026

- Lead enterprise-scale execution across engineering, architecture, and product teams, translating strategic priorities into actionable roadmaps, milestones, KPIs, and delivery plans.
- **Drive quarterly planning**, aligning roadmap priorities, resource allocation, scope, and stakeholder expectations across concurrent initiatives.
- Coordinate backlog readiness, requirements decomposition, and translation of business needs into epics, workflows, user stories, and engineering execution plans.

- Designed and led **AI-enabled workflow automation** using Python and FastAPI for capacity planning, epic management, and user-story creation, **reducing story-creation time by approximately 60%**.
- Established delivery visibility through programme reviews, KPIs, and stakeholder reporting, helping teams identify risks and align priorities across concurrent initiatives.
- Partner with product and engineering leadership to balance customer needs, technical sustainability, scope, and delivery predictability.

Avathon | Engagement & Program Manager | Enterprise AI & Digital Platforms | 2019 – 2025

- Directed enterprise mobile and AI platform delivery across more than five global regions, aligning engineering, architecture, QA, DevOps, product, and customer stakeholders.
- Aligned customer, vendor, engineering, and business stakeholders on delivery milestones, issue resolution, and operational readiness.
- Led Agile execution and program reviews spanning sprint planning, roadmap reviews and backlog refinement.
- Improved release predictability through proactive **dependency management, risk mitigation**, and transparent delivery governance.
- **Enabled more than \$4M in business impact** through enterprise platform rollouts and improved operational efficiency.
- Managed distributed global teams across time zones and supported program health visibility through delivery dashboards, project plans, workflow documentation, decision records, and stakeholder reporting.
- Drove architectural and operational improvements that **reduced system latency by 45%**.

Avathon | Technology Lead (Software systems) | 2017 – 2019

- **Built a mobile engineering team from scratch** to serve two European customers, establishing the team needed to deliver and support their requirements.
- **Led 10+ engineers delivering AI-based systems**, mobile applications, integrations, and enterprise platforms.
- Supported enterprise-grade **product rollouts serving 1,500+ global users**.
- Participated in architecture planning to ensure scalability, security, and technical sustainability.
- Strengthened team execution through structured planning, requirement clarity, and engineering coordination.

Earlier Career | Software engineering | Technical delivery | 2014 - 2017

- Built mobile and software solutions within the healthcare domain, developing foundational expertise in mobile engineering, software delivery, and enterprise systems.

EDUCATION

- B.Tech in Computer Science: Punjab Technical University -2014

CERTIFICATIONS

- Certified Scrum Product Owner (CSPO)
- Google Certified Android Developer
